

```
//function to take names and greets in Luganda
function namex(nme){

    //Print statement in this case console.log
    console.log("Jjebaleko",nme);
    console.log("Genki dane",nme,"-san");

}
namex("Richard");//Richard = nme
//"Richard is called to function namex and then insert in the
console log"
```
